

QUARTZITE

Allure

Type	Quartzite
Finish	Polished
Color family	White
Origin	Brazil
Sealing	Confirm requirements for the selected stone

Allure is a Brazilian quartzite sold in the US by MSI, sourced from Brazil and known for a chunky pattern of creams, grays, blues, and white veining. As a metamorphic stone, it formed when ancient quartz sandstone was buried and recrystallized under heat and pressure, fusing the quartz grains into an extremely hard, scratch- and etch-resistant surface that outperforms granite. The name 'Allure' is a marketing reference to the stone's eye-catching, alluring veined appearance rather than a place.

CARE & INSTALLATION

Clean with warm water and a stone-safe cleaner; wipe spills promptly and use trivets. Sealing needs depend on the selected stone and its use; confirm the care schedule with us. Slab movement and tone vary from swatches. Confirm the actual slab, finish and thickness before fabrication.
