Andes Black

Type	Quartzite
Finish	Polished
Color family	Black
Origin	Brazil
Sealing	Confirm requirements for the selected stone

Andes Black is a Brazilian quartzite carried by MSI, quarried in Brazil and prized for its dramatic black background crossed by bold white veins. It originated as quartz-rich sandstone that metamorphosed under deep heat and pressure into a recrystallized quartzite, giving it greater hardness and far better scratch and etch resistance than granite. The 'Andes' name evokes the rugged grandeur of the Andes mountains, though the stone itself comes from Brazilian quarries rather than the Andean range.

CARE & INSTALLATION

Clean with warm water and a stone-safe cleaner; wipe spills promptly and use trivets. Sealing needs depend on the selected stone and its use; confirm the care schedule with us. Slab movement and tone vary from swatches. Confirm the actual slab, finish and thickness before fabrication.
