

QUARTZITE

Azul Treasure

Type	Quartzite
Finish	Polished
Color family	Blue
Origin	Brazil
Sealing	Confirm requirements for the selected stone

Azul Treasure is a Brazilian quartzite offered in the US by MSI, sourced from Brazil and showing a dramatic mix of blue, gray, white, and beige with copper, gold, and silver-toned veins. It is a metamorphic quartzite, formed when quartz-rich sandstone recrystallized under heat and pressure into a hard, dense surface with strong resistance to scratches and etching. The name pairs the Portuguese 'Azul' (blue) with 'Treasure' to evoke the prized, jewel-like blues that run through the stone.

CARE & INSTALLATION

Clean with warm water and a stone-safe cleaner; wipe spills promptly and use trivets. Sealing needs depend on the selected stone and its use; confirm the care schedule with us. Slab movement and tone vary from swatches. Confirm the actual slab, finish and thickness before fabrication.
