| Brand        | Coldspring                                  |
| Finish       | Polished                                    |
| Color family | Brown & Beige                               |
| Sealing      | Confirm requirements for the selected stone |

Magma Brown is a granite in Coldspring's slab program (Level 5) — quarried and finished stone from the Cold Spring, Minnesota operation, with slabs viewable at their Maple Grove location.

### CARE & INSTALLATION

Clean with warm water and a stone-safe cleaner; wipe spills promptly and use trivets. Sealing needs depend on the selected stone and its use; confirm the care schedule with us. Slab movement and tone vary from swatches. Confirm the actual slab, finish and thickness before fabrication.
