

GRANITE

Santa Cecilia LC

Type	Granite
Finish	Polished
Color family	Gray
Origin	Brazil
Also called	St. Cecilia, Santa Cecilia LC, Santa Cecilia
Sealing	Confirm requirements for the selected stone

Santa Cecilia is one of the best-known Brazilian gold granites, quarried in Brazil (often cited in the São Paulo / Minas Gerais region). Geologically a medium-to-coarse-grained gneiss/granite of the Precambrian period containing garnet and sillimanite, it shows a beige-to-gold background with burgundy, gold and dark-grey veins. Named for Saint Cecilia, it is a long-standing staple of the gold-granite market.

CARE & INSTALLATION

Clean with warm water and a stone-safe cleaner; wipe spills promptly and use trivets. Sealing needs depend on the selected stone and its use; confirm the care schedule with us. Slab movement and tone vary from swatches. Confirm the actual slab, finish and thickness before fabrication.
