

GRANITE

Sapphire Blue

Type	Granite
Finish	Polished
Color family	Blue
Origin	Telangana, India
Sealing	Confirm requirements for the selected stone

Sapphire Blue is a striking blue granite quarried in the Telangana region of southern India and processed in cities such as Bangalore and Chennai. Geologically it is a very coarse-grained cordierite-bearing rock of the Precambrian period, with large brown-red feldspar phenocrysts and blue-grey quartz that produce its deep blue, grey and black tones flecked with white. The name 'Sapphire Blue' directly evokes the gemstone-like blue cast of the stone.

CARE & INSTALLATION

Clean with warm water and a stone-safe cleaner; wipe spills promptly and use trivets. Sealing needs depend on the selected stone and its use; confirm the care schedule with us. Slab movement and tone vary from swatches. Confirm the actual slab, finish and thickness before fabrication.
