

GRANITE

Silver Cloud

Type	Granite
Finish	Polished
Color family	Gray
Origin	India (trade slab); a separate deposit exists in Georgia, USA
Sealing	Confirm requirements for the selected stone

The Silver Cloud sold by MSI and most US distributors is a fine-grained grey-to-white gneiss quarried in India, marked by graceful swirls of black and silver-gray over an ivory ground (it is sometimes also called Viscount White). Confusingly, a genuinely named 'Silver Cloud' granite deposit is also quarried near Atlanta, Georgia, so the name covers more than one stone. The 'cloud' refers to the soft, smoky banding of the gneiss, a metamorphic-igneous rock.

CARE & INSTALLATION

Clean with warm water and a stone-safe cleaner; wipe spills promptly and use trivets. Sealing needs depend on the selected stone and its use; confirm the care schedule with us. Slab movement and tone vary from swatches. Confirm the actual slab, finish and thickness before fabrication.
